News from Skandiabanken Open Banking

2025-03-24 – AIS Redirect flows – Client Id

Information to the users of Skandiabanken Open Banking APIs.

As mentioned in our previous newsletter, published 20th of February, we are making some updates to our PIS SCA with redirect.

The changes will affect URL when initiating the SCA using the redirect flow. In the response, from the payment initiation service, in today's solution, you receive a redirect url. The parameter "client_id" will have an updated value from 'i_openbanking_short' to 'i_openbanking_sign'

These changes are non-breaking and will not affect you if you have followed the guidelines outlined in our technical documentation.

Release is scheduled on the 27th of March.
